Fake independence, collaboration with the enemies & moral collapse of the Muslims

Dr. Firoz Mahboob Kamal

The infrastructure of enemy occupation

In 2003, when the US Army took over Baghdad, hundreds of Iraqis came to the street to celebrate the American victory. Prior to that, many of the Iraqi leaders invited and co-operated with the murderous US Army. The same happened with the USA's invasion of Afghanistan and Syria. So the occupation of people's mind took place prior to the geographical occupation. In the last 70 years, most of the Muslim countries have received independence from the direct rule of their colonial masters. But, the so-called independence doesn't give the Muslims the basic human rights to fully practise their political independence. Nor do they enjoy the religious rights to practise even the most crucial and defining Islamic obligations like sharia, *hudud*, shura, *khilafa*, trans-ethnic Muslim unity and jihad in any of these so-called independent Muslim countries. Whereas, prior to the colonial occupation, the Muslims fully enjoyed such rights. The geographical occupation has ended but the mental occupation continues.

The so-called independence has turned so fake that it doesn't give the basic rights to dismantle the divisive and de-empowering walls of the Muslim World –especially in the Middle East. These divisive borders in the Muslim World were created not to serve the Muslims. These are made only to keep the Muslims weak and to serve the colonial interest. Any attempt to draw the political map on the basis of the obligatory pan-Islamic brotherhood –as was the norm in most part of Muslim history,

is considered a threat to their interest and hence get reversed even by fully-fledged wars. The enemy-imposed disintegration of the Muslim World into 57 states is now labelled as an integral part of international stability and security; hence, not allowed to break these walls. This is indeed the infrastructure of occupation.

The western imperialists fully understand that their dominance in the Muslim World can't survive only with military victory. It needs ideological, social, cultural and geopolitical engineering. The geographical disintegration, de-Islamisation, secularisation, cultural conversion and delegitimisation of jihad are the indispensable parts of such engineering. And in its execution, the western imperialists have shown remarkable brilliance. They could take Muslims far away from Islam. So, in the First World War, the British and French imperialists could recruit more than a million Arab Muslims as mercenaries to occupy Muslim lands for them. The enemies' success in ideological and cultural engineering is so huge that the Arabs celebrate the division of their land into 22 parts and jihad –the most important ibada in Islam stands alien among the Muslims. Even jihad against foreign occupation is labelled as a terrorist act. The project of de-Islamisation has been so successful that Prophet (peace be upon him)'s Islam with its core elements like sharia, hudud, shura-based rule, pan-Islamic unity doesn't survive anywhere in the Muslim World. The profound success of enemies' cultural engineering can be seen in clubs, pubs, casinos and the coastal beaches of the so-called Muslim countries like Turkey, Lebanon, Egypt, Tunisia, Algeria, Indonesia and many others. The practices there are seldom different from *kuffar* countries. In fact, the Muslims have been ideologically and culturally moulded to live without Islam.

About 1.3 billion Indians of different religions, languages, casts and ethnicities live in one state. But less than 300 million Arab Muslims of the same language, religion and ethnicity are forced to live inside the walls of more than 20 states –like the condemned detainees in prison cells. Such divisive prison cells –called states, are built to serve the exploitative interest of the imperialists, the security interest of Israel and the survival interest of the autocratic

despots. These walls are erected by the imperialists to stop the spillage of oil revenues to the neighbouring poor people. These are reserved only for their own exploitation. The oilfields are given statehood. Separate flags of statehood are hoisted on oilfields like Kuwait, Bahrain, Qatar, UAE, Oman, and Brunai only to feed the imperialists. The colonial *kufir* laws, the western evil ideologies, the corruptive politics and the economics of multi-national exploitation still maintain their unfettered occupation in these so-called independent states. What could be the worst irony that the Muslims celebrate such occupation as liberation! The anti-Islamic secularist elites -trained and tamed in the old colonial institutions, play the servile role to sustain such occupation. In most of the Muslim countries, the civil and military enclaves of these ruling elites are indeed the ideological cum cultural islands of the western imperialists. These enclaves show little dissimilarities from the western mainlands.

As a result of such occupation, trillions of dollars of oil, gas, petrodollars and other natural assets of the Muslim World are adding more affluence and military strength to the imperialists to sustain the occupation. All the bombs and missiles that are dropped on the people of Iraq, Afghanistan, Syria, Somalia, Yemen and other countries are indeed made by oil and gas money of the Muslim countries. As if, they are frying fish in their own oil. It is a pity that despite trillions of dollars of unearned petrodollars, 1.5 billion Muslims continue to remain the most powerless and the most defenceless people on earth. The brutal rulers of these client states receive the non-stop supply of bomber jets, heavy artilleries, tanks, cluster bombs, chemical bombs, and missiles to subjugate their own people. While visiting Saudi Arabia, the former US President Mr Donald Trump made a deal to sell 110 billion US dollars of weapon to enhance the kingdom's killing power against its own people and neighbours. The USA also sold 12 billion dollars of weapons to a tiny country of Qatar with a native population of less than four hundred thousand.

The collective failure

For the ongoing occupation of the Muslim countries, not a single person, group, generation or tribe to be blamed. It owes to the collective failure of the whole *ummah*. The rebellion against the decree of Allah Sub'hana wa Ta'la and pursuance of their own opportunistic agenda indeed lies in the heart of all failures. They ignored the Islamic principle that obeying the Qur'anic prescription is an obligation on every Muslim and no one is exempted from the obligation. Awfully, most of the Muslims pay little heed to such Qur'anic command. Islam is no more practised in the way as has been practised in the early days of Islam. When the Muslim countries remain occupied by the colonialists for about two hundred years, most of the Muslims showed total inaction or abstention. A very few took part in obligatory jihad against the occupying *kuffars*. Their action thus stands exactly opposite to that of the early Muslims. When the first Islamic state was attacked by the Arab, Persian or Roman *kuffars*, the Muslim participation in jihad was more than 90 cent percent. Only the sick, the blind and the lame stayed behind. In the war against the invading Roman Army in Tabuk, only three Muslims didn't take part. In response, they faced a social boycott.

Iman of a believer never stays hidden. It is visibly expressed through participation in war in the way of Allah Sub'hana wa Ta'la. The physical, financial and intellectual engagement in jihad against the enemies of Islam indeed works as the most reliable marker of *iman*. Even a hypocrite can dress like a Muslim. He can join five times a day in religious rituals and can also spend money on charities. But, he doesn't possess the moral strength or appetite to join a war against Islam's enemies. The enemies of Islam now appear everywhere; almost all of the Muslim countries stand under one or other forms of occupation. These forces of falsehood have dismantled sharia, *hudud*, shura, Muslim unity, Islamic education and other basics of Islam all over the Muslim World. But, where is jihad against these warring forces of falsehood? Instead, they accept them as the leader and celebrate their rule. Whereas, because of jihad, a few thousand people of Medina could raise the most powerful Islamic state in history. They could defeat two contemporary World Powers like the Roman and the Persian Empires. Within a very short period of time, they emerged as

the most powerful state on earth. They could release millions of people from centuries-old slavery and tyranny. Because of the Islamic State, the Muslims could also practise full Islam with its sharia, *hudud*, shura, *khelafa* and trans-ethnic Muslim brotherhood without an iota of compromise. This is why they got labelled as the best people on earth of all ages.

The betrayal and the deviation

Prophet Muhammad (peace be upon him) is recognised as the best prophet and the best man in the whole span of human history. Such credit doesn't owe solely to his role as the great preacher of Islam. Rather, it is due to his decisive role as a political leader who could successfully defeat the forces of evils and raise an Islamic civilisational state which could become the most powerful World Power in the contemporary world. He worked as the head of the Islamic state for ten years and left an invaluable legacy vis-a-vis running a state. If he had limited his works only to teaching, preaching and doing rituals, the Muslims had to live under the kuffar occupation –as is the case with the Palestinian, Kashmiri and Uighur Muslims today. Then, raising head as a dominant civilisation force would have remained only as a dream.

Prophet Muhammad (peace be upon him) turned politics into a life-long *ibada* –called jihad to eradicate the forces of evils and implement the truth and justice. The obligatory prayers are the binding obligation unto Allah Sub'hana wa Ta'la. But the life-long political war to Islamise state and societies is an obligation unto mankind. The deeds like donating money, building a house, giving education and curing illness are good works. But the greatest service to mankind is to establish a safe and welfare state free from falsehood, oppression and injustices. Lecturing on morality and preaching good words don't need to be a saint. Anyone can do that. But the real merit lies in the implementation. Good words do not bring any benefit if fail to get implemented. Prophet Mohammad (peace be upon him) not only preached morality, humanity, equality and people's right, but he could also

fully implement that. That makes him distinctly different from others. He is indeed unique in the whole history of mankind. So he is the greatest man in the history of mankind. Politics of eradicating the evils and enjoying justice is his greatest legacy. But the Muslims are now known for the dismal betrayal against such prophetic legacy.

The enemies of Islam are not afraid of Muslims's huge number. Nor are they worried about millions of mosques and the increasing number of attendants. They are only worried about Prophet (peace be upon)'s political legacy that can turn Muslims into a powerful revolutionary force. The enemies are deadly against such Islam of the Prophet (peace be upon him). They have given it a new name called political Islam. How ridiculous that the enemies even claim that such political Islam has no place in Prophet's Islam. What a shameful deviation! The ruling despots of Saudi Arabia, Egypt, UAE, Bahrain, Oman and many other countries are at the forefront against Prophet (peace be upon)'s political legacy. In fact, their Islam has no similarity with Prophet (peace be upon)'s Islam. In Prophet's Islam, there is no place for the autocrats. Therefore, the rulers like Abu Bakar (R), Omar (R), Osman (R) and Ali (R) didn't need to be a son of a king. These enemies of Islam hide the historical fact that Prophet (peace be upon him) ruled as the head of the state for ten years. It is a huge disgrace for the whole Muslim ummah that the seat which has the honour to have the Prophet (peace be upon him) on it has been usurped by autocratic tyrants. They were not elected by the people but selected by the colonial occupiers. As per their master's wish, they could drive the Ummah each day only to a new low.

The moral collapse

In comparison to the achievement of the early Muslims, the failure of today's 1.5 billion Muslims is highly awful and humiliating. They could raise large armies and could also build a huge number of shops, roads, schools, universities and industries. But, they can't even think of any Islamic state in any part of the world, let alone establishing it. They have made history in inaction, submission and

surrender. Millions of them have even taken the path of collaboration and coalition with the invading enemies only to appease their opportunistic greed. The moral depletion of today's Muslims has been so profound that it has caused them the serious ethical inability to hate, condemn or protest against the most brutal enemy aggression in any part of the Muslim world. So, the largest anti-war demonstration against the USA invasion in Iraq in 2003 didn't take place in any of the big Muslim capital cities like Jakarta, Islamabad, Cairo, Dhaka or Ankara rather in London, Paris or Rome. The moral failure of the Muslim thus gets displayed worldwide.

The symptoms of the collective failure of the Muslims are huge. These are expressed robustly through moral, cultural, spiritual, educational, ideological and political failures. Of the ten top most corrupt countries of the world, most are Muslim countries. Similarly, the most brutal autocrats who deny basic human rights to their own people also happen to be Muslim. These despots are so cruel and genocidal that they roll tanks and heavy artilleries on the streets to kill unarmed protestors –as seen in recent years in Cairo, Islamabad, Dhaka, and Damascus. The government of Syria dropped chemical bombs, barrel bombs and cluster bombs on the civilians to kill or evict them from their homes. When the people of Gaza got the shower of Israeli bombs, the Egyptian government didn't bother to open the border to receive even the wounded children and women. When the traumatised Rohingya Muslims from Myanmar tried to take shelter in neighbouring Bangladesh, initially their boats were not allowed to get nearer to the shore. They were forced to sail for far distant Malaysia, Thailand or Indonesia. Later on, the Bangladesh government was obliged to give them access to avoid global condemnation.

The enemy crimes and the complicity of the cowards

Cowardice causes incurable moral incompetence to be a true Muslim. To be a Muslim, it needs minimum courage for telling the truth and to stand against crimes and injustices. Nor does it help qualify for enjoying basic human rights. Such rights have never been a gift,

rather earned by bloody combat against the oppressive tyrants. It is a tragedy that a long period of imprisonment by the enemy occupiers always deconstructs souls, beliefs, behaviour and culture. It has proved highly catastrophic during the long slavery under the European colonial tyrants. It has worked as a strong dehumanising factor to culminate cowardice among the Muslims. If a lion is kept in captivity for decades, it detests coming out of the cage even if the door is left open. Because of long colonial taming, Muslims could be easy prey in the hands of the home-grown autocrats. Therefore, the criminal rulers are not the only party to commit crimes in the Muslim World, the complicity of the cowardly people who accept such native or foreign killers as the ruler and work as their obedient servants also bear the blame. Such submission to the criminal despots brings disgrace, failure and punishment both here and in the hereafter. Indeed, such submission to the criminal despots is incompatible with true submission to Allah Sub'hana wa Ta'la. This is why fighting against kuffar occupation is such a high *ibada* in Islam. Those who are killed in the encounter enter paradise without any trial.

The tyrants always make it impossible to follow the Qur'anic roadmap. Because they prescribe their own roadmap to be pursued by the subjects. This is why autocracy and Islam are incompatible. Hence, standing against tyrant rulers is not a political agenda, it is a prophetic job. To add more importance to that, Prophet Ibrahim (peace be upon him), Prophet Musa (peace be upon him) and many prophets were commanded by Allah Sub'hana wa Ta'la to stand face to face against the tyrants like Nimrod and Pharaoh. For freeing people from submission to the evil rulers, jihad comes as the highest form of *ibadah*. It stands as a Qur'anic obligation. To disseminate such a message, Allah Sub'hana Ta'la commands His great Prophet (peace be upon him) to announce the following Qur'anic advice to the people in public: "O prophet! Say (to the people): I advise you only on one thing, rise up for Allah (against the criminals who oppose Islam) in two (if possible) or singly (on your own)." -(Sura Saba, verse 46). So the Muslims are not given an option to wait for a big leader, a big party or Imam Mehdi for starting the assigned job.

The common *kuffar* agenda

Falsehood and its awful calamities never die. Instead, it keeps on challenging the Divine Truth all the time and in all places. In all ages, it gets new preachers, new leaders and new armies. Hence, the enmity to Islam that could attain the cataclysmic hype at the time of Nimrod, Pharaoh, and Abu Jahl still survives under the US-led imperialists. Corrupting the Qur'anic ideology of Islam as well as the physical, ideological and cultural occupation of the Muslim *ummah* receive the highest priority in their politics, economics and warfare. For carrying out such an anti-Islamic agenda, they have recruited a huge number of fake *ulama*, fraudulent Muslim intellectuals and mercenary soldiers from the Muslim lands. They consider the rise of Islam as a great threat to western civilisation. In his meeting on July 6, 2017, with the Russian President Mr Vladimir Putin in Hamburg, the former USA President Mr Donald Trump very candidly expressed such fear. To encounter the Islamic challenge, he sought very earnestly the Russian collaboration. Such a request for Russian help exposes his deep fear that the USA alone can't win its war against Islam. Such Islamophobia dominates not only in the psyche of President Donald Trump, the leaders of the EU, Russia, India, China and other non-Muslim countries are no exception. These *kuffar* countries have a lot of differences on a lot of issues; but while they deal with Islam and the Muslims, show the full consensus. Because of such consensus, these imperialist countries could easily give the full legality to the illegal creation of Israel on an entirely occupied Muslim land of Palestine. They also show a similar consensus on the Indian occupation of Kashmir. Now, they show the full consensus too in condemning any resistance against such illegal occupation as terrorism. Because of the same anti-Islamic venom, fighting against the US-led occupying force in a Muslim land get condemned as terrorism.

Each of the imperialist countries has its old anti-Muslim and anti-Islamic war in its own domain. Such wars take these countries naturally and understandably to the anti-Muslim camp. The USA is heavily entangled in its never-ending imperialistic war against the

Islamists in Afghanistan, Iraq, Syria, Yemen, Somalia, Palestine and many African countries. The USA Army has killed more than a million people in those countries and turned hundreds of cities and villages into rubbles. Thus the USA has already raised a huge flame of hatred in the Muslim souls; every day they are adding more fuel to the flame by killing more people. Russia has a similar genocidal war in Chechnya, Ingushetia, Dagestan and Syria. In 1999, the Russian Army flattened the whole city of Grozny –the capital of Chechnya and killed thousands of Muslims there. The Russian warplanes also flattened the historic Syrian city of Aleppo and many others in Syria too. India's war in Kashmir and China's war in Xinjiang are no less genocidal either. More than a hundred thousand Muslims have already been killed in Kashmir. The Indian Army's killing mission still continues with more lethal weapons. Indian Prime Minister Narendra Modi's visit to Israel definitely added more killing skills and more sophisticated weapons to the Indian Army. Anyone who stands against such killing of Muslims is labelled as a terrorist. But those who occupy foreign countries, flatten cities and kill millions ironically claim to be the torchbearer of democratic values. Like many western leaders, President Donald Trump used to claim that the USA is at war to defend Western values!

Therefore the question arises if the USA wars of occupation, genocide and destruction are applauded as the defence of western democratic values then what else is barbarity? On such a perverted conceptual premise, evicting people from homes, total destruction of cities and bombing people to death is declared as a victory. Therefore, almost total destruction of Aleppo, Ramadi, Fallujah, Tikrit, Kobani, Raqqa and Mosul is celebrated as a great victory both by the occupying power and their cronies in the Muslim land. The occupied Muslim lands have indeed proven to be the fertile breeding ground for such servile cronies. The physical, intellectual and political occupation has proven to be so much morally toxic that the Muslims of the occupied land even join the *kuffar* enemies to celebrate their victories –as seen in Jerusalem and Damascus in 1917, Dhaka in 1971, in Kabul in 2001 and in Baghdad in 2003. And now, they celebrate the occupation of their countries native tyrants.

The test and the failure

Allah Sub'hana wa Ta'ala has a strategy. From the very beginning of human civilisation, the world is ideologically, politically and culturally bi-polar. One pole is for true faith, morality, good deeds and justice. This is the pole of Allah Sub'hana wa Ta'ala. The other pole is for the falsehood, immorality, crimes and injustice. In this pole, all the deviations and perversions in the name of religions, ideologies, traditions, and cultures are lumped together. Shaitan is allowed to play a role here. He calls people to his pole of falsehood, crimes and immorality. There is no third or neutral pole. Like today, the world stayed always polarised. Such a state of bipolarity tests people's ability to select the right one.

Everyone has been given the free choice to side with any one of the two poles. The needed fitness of a human for a place in paradise is tested here in this world. It is indeed the most crucial and decisive test in life. But it is not a difficult test. Allah Sub'han wa Ta'a has created humans as His best creation and everyone is instilled with adequate intelligence to pass the test. He can even land on the moon with the imbued intelligence. People fail the test only because of the wrong focus and inattention. For passing the test, it needs to be correctly polarised. In the past, even a huge number of illiterate people could amply pass it. Moreover, thousands of prophets and many Divine books are sent to help people pass the test. Whoever fails the test indeed betrays all invaluable Divine endowments. For such a betrayal, one has to pay a heavy price. He or she qualifies for the hellfire.

Most of the people will burn in the hellfire not for killing, stealing or raping someone, but for failing this simple test of common sense. It never needs any college or university education to pass it. The wrong and the right, the truth and the falsehood, the morality and immorality are not difficult to differentiate. As the mid-day sun, these are distinctly visible. Fourteen hundred years ago even the illiterate men or women of Arabia could rightly identify the truth

The monopolization of wars and the new occupation in the Muslim World

Dr. Firoz Mahboob Kamal

The imperialists' wars and the subjugated Musli

The US and the European citizens exercise the arrogance to carry weapons anywhere in Afghanistan, Iraq, Saudi Arabia, Qatar, Kuwait, UAE, Syria, Mali, and many more Muslim countries. They even set military bases in those countries and seek no permission from anybody to kill anyone there. Rather, they are the people who give permission vis-à-vis who should carry weapons, make weapons or do war in the Muslim World. Anyone who carries a weapon, makes war, and changes the political landscape without their permission gets labeled as a terrorist and a threat to the so-called global security and stability. Such a doctrine of colonialism gives them a full monopoly of war and sanitizes every act of their invasion, oppression, murder, destruction, and exploitation in the occupied lands. They use the UN to receive such a certificate.

In the colonial era, the army of a tiny country like Belgium killed 10 million people only in Congo. And the British colonial army could almost ethnically cleanse the whole population of the Red Indians from the USA, the Aborigines from Australia, and the Maoris from New Zealand. These colonialists proved so shameless, remorseless, and morally so deprived that they erected statues of the leaders of genocidal cleansing on the occupied lands to glorify the massacres. Awfully, the same moral illness that caused immense deaths and sufferings in the former colonies still overwhelm the Muslim World. So the bloodshed continues. Like the era of old colonialism, these neo-colonialist killers do not face any conviction in the occupied lands. So they could kill more than a million in Palestine, Afghanistan, Iraq, Syria, Chechnya, Kashmir, and Yemen and could flatten hundreds of cities and villages without facing any criminal charge in any court of the world. Therefore, the avid killers of Muslims like George W. Bush, Tony Blair, Barak Obama, Donald Trump, Vladimir Putin, and Narendra Modi stand unpunished.

No Muslim country is immune to imperialists' aggression. And, no Muslim country can exercise any moral or legal right to penalize even the worst criminals of the occupying countries. This is why while the US helicopters ran a raid in Abbottabad in 2011 or Raymond Davis -an

armed CIA man killed two Pakistani men in Lahore in the same year, the government of Pakistan – a boastful nuclear power couldn't dare take any action, let alone punish the cold-blooded murderers. The President and the Prime Minister of Pakistan showed tongue-tied silence even to condemn such a horrendous crime. Therefore, one can easily guess what could be the case of the non-nuclear Muslim states like Indonesia, Bangladesh, Turkey, Egypt, Saudi Arabia, and others while subjected to the same imperialist arrogance. They could be easily coerced to fit into their agenda. This is why very few Muslim countries could resist the US pressure of joining a killing mission against Iraqi Muslims in 1991 on the pretext of Saddam's invasion of Kuwait. Whereas the same Muslim countries stayed silent while the USA invaded Afghanistan and Iraq, and Israel invaded Gaza and the Indian Army launched its killing mission in Kashmir.

Hypocrisy is the most conspicuous feature of the imperialists' policy towards Muslims. They have their own concocted narratives to justify their crimes. While the south Sudanese Christians started their terrorist campaign to dismember the largest country in Africa, the USA and its partners called it liberation war. Not only they give them full political support but also donated huge money and weapons. But while the native citizens of Afghanistan, Iraq, Palestine, Syria, Kashmir, or Chechnya do war to free their countries from the foreign occupiers get the label of terrorist. The US drones do not respect any border of any Muslim country and execute killing operations anywhere they wish. Israel does the same. This is indeed an absolute monopoly of a globalized war by the imperialists. They demand no less than total submission to their hegemony. Still, they blame the Muslims for their dirty mess and spread *Islamophobic* narratives as the cover-up. More awfully, most of the Muslim rulers, politicians, intellectuals and even *ulama* buy and spread the same enemy version of the stories. The sovereignty and dignity of more than 1.5 billion Muslims thus go to the gutter and the *kuffar* imperialists appear as the real masters of the Muslim World.

The Muslim mercenaries and their crimes

The USA has established about 800 bases worldwide. It has its Air Force base in Qatar, Naval Force base in Bahrain, and has installed a huge number of troops in Afghanistan, Iraq, Syria, Saudi Arabia, and many other Muslim and non-Muslim countries in the world to give long sustenance to the monopoly of their brutal war. Other countries like Russia, China, and India also run their regional monopolies in their occupied Muslim backyards. Russia has Chechnya and other Caucasian areas. China has Xing Xiang. And India has Kashmir. They also spread their own fabricated narratives to sanitize their war of blatant occupation. Whereas, the Muslims hide their own Islamic narratives, imperatives, and agendas in warfare. In fact, the ugliest deviation of the Muslims from the Qur'anic roadmap and the maximum damage to the *ummah* started with the betrayal of the Qur'anic agenda in warfare as well as with the denial of the core survival objective -as has been prescribed by Allah Sub'hana wa Ta'la. The journey to hellfire indeed starts from such a self-engineered deviation. Thus, *jihad* -the most powerful tool of implementation of Allah Sub'hana wa Ta'la's sovereignty on earth and to protect Muslims' independence is kept defunct to serve the agenda of the enemies.

Because of Muslims' own betrayal, Islam survives only in the pages of the Holy Qur'an. The mass-scale conversion of the so-called believers in Islam to evil ideologies like secularism, nationalism, racism, tribalism, fascism, and capitalism has brought the most catastrophic changes in their objective of survival and lifestyle. This has indeed caused an overwhelming shift in their political, educational, professional, and cultural priorities. Whereas, the Muslims must stay faith-bound only to please Allah Sub'hana wa Ta'la and die for His cause -as per the Holy pledge mentioned in Sura Taubah, verse 111. But these ideological converts to evil ideologies enjoy investing their wealth, talent, and even life for the known enemies of Islam. They willingly work as mercenaries not only in their civil and military infrastructures of evil, but also in media, education, information technology, commerce, and even in intellectual warfare all over the Muslim World. The newspapers, the TV channels, and other media outlets in the Muslim countries vividly display the works of these mercenaries. They indeed run a full-scale intellectual war against

Islam and the Islamists in every Muslim country. This is indeed a new form of invasive colonization of the Muslim mind by the worst form of corrosive ideologies -worse than the enemy's military occupation. Such inclusive and invasive colonization of the intellectual premise of the Muslims and the Muslim countries never happened in the past.

As a result, Muslim men, women, and children try in every possible way to make themselves fully congruent and saleable to the enemies at a higher price. They learn languages, earn skills, and train in subjects that have higher demand in the enemy's job market. They indeed dream for the enemies, migrate for the enemies, work for the enemies, and even do war and die for the enemies. For example, in two World Wars, more than one million Arabs and more than 200 thousand Indian Muslims fought for the British, the French, and the Italian imperialists. And now, millions of Iraqis, Syrians, Chechens, and Afghans are fighting shoulder to shoulder with the USA and the Russian *kuffars*. In 1971, thousands of Bengali Muslims joined the Hindu idolaters to dismember Pakistan -the largest Muslim country in the world. And the Pakistan Army under President Musharraf joined the USA's war in Afghanistan and handed over hundreds of Islamists to the Americans to be kept and tortured in Guantanamo Bay. Such betrayal against Islam and Muslims still continues.

Because of the self-selling mercenaries with a Muslim name, the enemies of Islam -both native and foreign thrive in the Muslim lands. Therefore, they could sustain their brutal occupation and carry out their aggressive anti-Islamic agenda in politics, education, culture, administration, judiciary, and warfare. Fighting in the way of Allah Sub'hana wa Ta'la and bringing back the glory of Islam no more survive as an issue in most of the Muslims' lives. Thus, the enemies of Islam have monopolized the whole war effort and political activities for their own benefit and left no space for true believers and for the true Islamic cause. In fact, more Muslims are now being killed in Muslim lands by these native mercenaries than by the alien *kuffars*. The Muslims now face a new enemy occupation with a new name. And the crimes being committed against Islam and Muslims remain the same.

Tyranny of fascists in Bangladesh

Dr Firoz Mahboob Kamal

Demolition of democracy & tide of tyranny

Fascism has never been a sign of civilized living. It is a symbol of pure barbarity. It is the rule of political criminals who make robbery on people's basic rights and annihilate all democratic values. In a democracy, power lies in the hand of people of all colors, races, and religions. The people execute the power through votes in elections, views in the media, rallies on the streets, and writing books or columns in the newspapers. But in fascism, such exercise of people's power doesn't exist. All tools of making opinions and influencing people are controlled by the despots. Fascism creates a milieu of immorality, oppression, dehumanization, and de-empowerment of the people. The despots in power execute the worst brutality to keep the people in tight control. This is why it is incompatible with the people of enlightenment, morality, and higher values. Bangladesh is in the grip of such a brutal rule of fascists Shaikh Hasina –the leader of Awami League. The people of Bangladesh suffered from the same fascism under Shaikh Mujiber Rahman –father of Shaikh Hasina in the first half of the seventies.

Shaikh Hasina –like her father Shaikh Mujib used and abused democratic rights to snatch people's rights. Her party was defeated several times in fair elections. But fascists can't tolerate electoral defeats, hence hate fair elections. This is why they take electoral tools into their own hands. Hence, after coming in power in 2008, Shaikh Hasina abolished the neutral caretaker government formula introduced in 1991. Institutions like impartial election commission, free participation in the election, free media, neutral state bureaucracy, basic human

rights, and an independent judiciary are dismantled. The Army, the police, the election commission, and the party cadres were used to rob the general elections in 2014 and in 2018. She made it impossible to change the government in power through votes. Elections were used only to extend Hasina's autocratic rule. In 2014, even 5 percent of people didn't cast their votes and there was no polling booth in 153 constituencies of the parliament. But the enslaved Election Commission declared it a fair and legitimate election. On 30 December 2018, the ballot papers were robbed in the night before Election Day by the party hooligans and were cast in bulk in favor of Shaikh Hasina's Awami League candidates. The Army and the police were deployed in the polling booth only to facilitate the robbery. Therefore the ruling fascists won in all seats except a few reserved for the pet opposition candidates.

Hasina runs the show of her own chosen model of democracy in Bangladesh. The absence of rule of law shows its awful manifestations in every nook and corner. The forced disappearances or extrajudicial killings of the political opponents, hanging of Islamist leaders by the fake judiciary, muzzling of the free press, closing independent TV channels, torturing people for protesting in the street, and impunity for the ruling party's murderous hooligans are the new normal in Bangladesh. Laws are made and executed only to protect the ruling elites and punishing the opponents. Thousands of people are forced to take political asylum in foreign countries or to hide inside Bangladesh to avoid death or persecution in police custody.

The brutal fascism

The tribal barbarity never dies. It only changes its forms and brutality. It has returned back to Bangladesh with a new form and new intensity. It is Awami fascism. Instead of the supremacy and arrogance of an ancient pagan tribe, fascism is now practiced as the absolute supremacy and arrogance of a single political party. It doesn't leave any space for other parties or beliefs. Here the rule of law doesn't work; only the whims of the party leader get preference. Bangladesh's

80 percent export earning comes from readymade garments. But the garment workers' salary is lowest in the world. They are not allowed to do any trade union movement for better salary and improved working conditions. A young man named Aminur Rahman faced forced disappearance –possibly death for attempting to organize garment workers.

Whenever human civilization makes some progress from fascism, the basic human rights and the rule of law return back. But for such civilizational progress, it requires some institutional build-up based on morality and higher human values. The human body can't survive with non-functioning or dis-functioning vital organs like the heart, lung, liver, and brain. Similarly, a civilized society can't survive with the absence of basic human rights and value-based institutions. This is why the right to free expression, the right to forming an organization, and the right of practicing religion are so vital for civilized living. Hence, free judiciary, impartial rule of law, free media, and unbiased state institutions are indispensable for it. But in Bangladesh, all such institutions are successfully dismantled. The imams are put behind the bar only for delivering sermons that don't fit in Hasina's political line. The media is allowed only to praise the government policy. Those who showed courage to reveal true stories either faced forced disappearance or death.

Like pagan beliefs, fascism survives only through the brutal forces of the power-addict rulers. It doesn't possess any moral ground. They didn't allow even the most peaceful man like Prophet Mohammad (peace be upon him) to preach Islam. They enforce their own sovereignty. Pharaoh is a classic prototype of such rulers. Mujib and Hasina appeared as mini Pharaohs in Bangladesh. Statues of Shaikh Mujib are installed to demand neck bending submission to his political and ideological narratives. Putting a floral wreath on the feet of his statues is taken as a marker of such submission. Idols are no more the stuff of temples; these are brought to streets, squares, and doorsteps of schools, colleges, and other public premises to make statue-worshipping a popular culture in Bangladesh. Thus, fascism has built a new cultural and ideological milieu that is 180 degrees opposite to the Muslims' faith. Because of such ideological and political

enslavement, fascism makes it impossible for a Muslim to grow up as a true Muslim. Enforced allegiance to autocrat indeed works as a bar to submission to Allah Subhana wa Ta'la. In fact, allegiance to an autocrat makes people slavish soldiers fighting for his or her cause and turn inimical to Islam. This is why those who are aligned with fascist Hasina show stern enmity against Islam and the Islamists.

The calamity of Awami immorality

Those who are the power-addict, find morality a big barrier against their whims. Therefore, they drop it in the bin on day one of their political careers. As a result, moral deprivation or immorality is the most distinctive element in their character. Because of such moral deprivation, Shaikh Mujib could easily bury multi-party democracy and impose a one-party brutal dictatorship. He didn't hesitate to betray his own electoral promise of democracy. Shaikh Hasina showed the same betrayal against the caretaker government. When she was out of power, she fought for it. But when in power, she abolished it. In both situations, addiction to power was the guiding force and not morality. Whereas, holding the parliamentary election under a caretaker government was the consensus formula of all political parties in Bangladesh –adopted in 1991. It has its historical background. Since party-based government repeatedly failed to hold fair elections, an election under a caretaker government was preferred as the only option by all the political parties including the Awami League. Under such a caretaker government, elections were successfully held in 1991, 1996, and 2000. There was no post-election complaint against the fairness of the election. Such a successful experiment of the caretaker government indeed encouraged other countries like Pakistan to think about it.

Moreover, the constitutional legality of such a caretaker government was never challenged by any political leader, nor by any legal expert. Even Shaikh Hasina couldn't openly raise any objection against it. She could take only a deceitful secretive route by using Chief Justice Abul Khair to abolish it. It is significant to note that even three previous Supreme Court Chief Justices didn't consider it illegal to

head the caretaker government. But Chief Justice Abul Khair unsettled the settled issue and opened the door of serious political instability in the country. He indeed served the agenda of power-hungry fascists. He was so desperate to serve his presumed beneficiary that nobody needed to ask him to deliver a judgment on it. In an unrelated non-constitutional litigation, he jumped on the issue of caretaker government and abolished it by making a casual remark on its constitutional legality. He didn't allow any legal experts to make any argument on the subject. Whatever he had in his mind was announced as a final Supreme Court verdict. Thus, Shaikh Hasina was given a green signal to go ahead with her agenda. Later on, it came to the press that the same Abul Khair took one million Taka from Prime Minister Shaikh Hasina's Relief Fund.

Now, there exists little doubt about the real beneficiary of his judgment. It gave the sitting Prime Minister Shaikh Hasina the opportunity to engineer an election coup in 2014. Thus it shows how the highest court of the country can be complicit to promote evil agenda of a power-addict autocrat. In such a forged election, Hasina didn't need to launch any tiresome election campaign. Nor did she need to open polling booth in more than half of the country. She could easily manufacture a victory for her party only by appointing a compliant Election Commissioner and using the servile administrative machinery. And in December 2018, the enslaved electoral machinery helped her to make country-wide robbery on ballot papers. Through such election engineering the victory is so guaranteed for the ruling party that the party stalwarts could openly claim that Shaikh Hasina will stay in power till her death.

In fascism, sovereignty belongs only to the ruler. The people are made only tax-paying powerless subjects. In the name of election what gets imposed on the people is not democracy but slavery unto the ruler. In fact, the people of Bangladesh is now experiencing such a political slavery. In the past, Hasina met electoral defeats on multiple occasions. Since she couldn't manipulate the election as the head of the government, she had to swallow those defeats. After the abolition of care-taker government, the whole election process has become a

selection process to benefit the ruling dictator. In the past, no one could defeat even the most unpopular dictator like General (rtd) Ershad in any election while he was in power. Now, who can dare defeat Shaikh Hasina and her party while she is in power?

The stalemate

Bangladesh is back to square one. The people have to start afresh and a very difficult journey for democracy. Without a functioning heart, how can a body survive? How can democracy survive without a fair and free election? Here lies the crux of the whole political pathology of Bangladesh. As a result, the confrontational politics between the illegitimate fascist government and the democratic opposition forces stay as the permanent feature. The country thus enters into a war-like situation. Like drug addiction, power addiction also kills common sense. Because of that, the ruling Awami League leader fails to understand the simple fact that fake or robbed elections –even if held ten times, can't solve the problem. It can only aggravate the crisis. Such an election can only cause a huge wastage of money.

Shaikh Hasina and her cronies also talk about democracy. But they conveniently forget that free and fair election is its lifeline. In the absence of a free election, democracy also dies. Then, the people are deprived of any tool to punish the government for its wrongdoing. As a result, the ruling party feels unaccountable and freely engages in corruption, atrocities, vote-rigging, and other barbaric evils without any fear. The people may have huge anger, but stand helpless to change the government. As a result, the government can freely use judicial and extrajudicial killing, torture, imprisonment, enforced disappearance, and politically motivated criminal cases to eliminate the political opponents. This is why under the rule of Shaikh Hasina, the killing and enforced disappearance of the opposition leaders is so rampant. and public meetings, free press, free election, and fair judiciary stand as a rarity. The government is using its weaponized media to smear the defiant leaders. Whoever exposes the government's wrongdoings meets with harsh punishment or even faces death. The

enslaved media is left with no option other than to support the government policies.

Elimination of fascism: an urgency

Islam makes people incompatible with the political and ideological project of autocrats. Autocrats never leave any space for Islam to play a political, ideological, and cultural role. Islam is kept captive within rituals. Hence, it is heinous treason against the Almighty Allah if a Muslim invests the Allah-given endowments in the service of any autocrat that restricts the practice of full Islam. In order to promote an Islamic cause, it needs a promotive environment. Therefore, the elimination of fascists is an indispensable Islamic necessity. It is an Islamic obligation on every Muslim that he must deploy his physical, moral, spiritual, and intellectual abilities to promote the cause of Allah Sub'hana wa Ta'la. This is why the history of Islam is the history of fighting against the autocrats. Through ages, it has always been the moral and ideological binding on every Muslim either to dismantle the autocratic rule and build an Islamic state or migrate from a devilish prison-state to a safer place –as did Prophet Muhammad (peace be upon him) and his companions. It is indeed the greatest political *sunnah* (legacy) of the Prophet (peace be upon him) that shows how to play a civilizational role for mankind and please Allah Subhana wa Ta'la. In fact, such a prophetic legacy (*Sunnah*) made the Muslims the greatest civilizational power in the whole human history. It is indeed the gravest crime of an autocrat that puts a bar against such a great civilization march.

The only option

Holding a fair election is not space science. Even a country like Pakistan, India, Nepal, Sri Lanka, and the Maldives can do that. It only needs an element of morality. But the fascist Awami League leader Hasina doesn't have that. She feeds only on sadistic perversion. That creates a real crisis in Bangladesh. The fascists can never run a

democracy. They are trained only to run brutal autocracy. It also a historical fact that fascists were never defeated by votes in any part of the world. Robbing or rigging the election is the craft they can claim expertise in that. So, killer Bashar al-Assad of Syria could manage 95 percent votes in the election. Hosni Mubarak of Egypt could get 98 percent of the votes. And Shaikh Hasina can win almost all seats in the parliament –as she did in the 2018 election. There are defeated only by people’s revolution. There exists no other option.

Now it is the time to change the vocabulary. Those who rob people’s voting rights and stay in power by the brutal force of the Army and the Police must be labeled as terrorists. Those who fight these terrorists must be applauded as freedom fighters. A fascist regime never gets support from the people. They survive only on the support of foreign countries. Shaikh Hasina enjoys such support. India, the USA, and the European countries now severely suffer from Islamophobia. Shaikh Hasina understands this western pathology and is taking full benefit of that. She smears the main opposition parties as to the promoter of Islamic extremism cum terrorism. She takes those lies to the foreign camps. She thinks such lies will help remove her own illegitimacy and allure the world powers to support her. On 28th May 2018, her government convened the foreign diplomats at Dhaka. She gave them a lecture eulogizing her own project and maligning the opposition. She manipulates the Islamophobia of the non-Muslims in western countries to pull them to her side. Her harsh policies towards the Islamic parties are projected as saleable credentials.

It is also true that the USA and its European allies have little love for democracy. Rather their love for autocrats and fascists is quite robust. So the brutal king of Saudi Arabia, the killer General Abdel Fateh Sissi of Egypt and the autocrats of the Gulf States thrive on their love. Their hatred is mostly against the Islamists –even if they are elected by popular votes. So in the Muslim countries, the USA and its allies are the real obstacles in the path of democracy. Bangladesh is not an exception either. Very recently, a population survey was conducted by Democratic Alliance Foundation on 50 thousand people in 53 countries. The majority of the respondents opined that the USA and

its allies are the main obstacles in the path of democracy in the world. By dismantling the democratic process in Egypt, Algeria, and Palestine and rolling back the Arab Spring, the USA and its allies gave ample testimony to that. The democratic forces of Bangladesh must understand this stern reality. So the people of Bangladesh must fight their own battle. About 90 percent of the people of Bangladesh are deadly against fascist Hasina. No civilized citizen supports her evil rule. She is surviving only because of the disunity of the people. If the people stand united on the street, she will not find even a road to flee. Her foreign friends will not be able to protect her.
21.06.2021

Restriction on militarization of Muslims and massive militarization of the enemies

Dr Firoz Mahboob Kamal

Restricting militarization and the enemy occupation

The massive militarization of Islam's enemies and restricting militarization of the Muslims are the old two-prong enemy strategy that the Muslims are facing for centuries. Because of such a strategy, nobody puts an embargo on Israel for its secret piling up of nukes. But Iraq was occupied and its cities were bombed to rubbles on the false accusation of making weapons of mass destruction. And Iran faces an embargo although stays far away from any nuclear possession. For the same reason, the USA refused to give high tech missile defence system and the latest model of fighter jets to Turkey.

Since the colonial takeover of the Muslim World, the implementation of such a strategy got highly intensified. The colonial occupiers could carry a sophisticated weapon but the native Muslims were punished for carrying even a knife. The current worldwide dominance of the western imperialists owes to the high operational success of this strategy. The enemy occupation has its various facets: mostly operates in the form of military, economic, cultural, ideological and political occupation. The enemies are of two categories: the homegrown and the alien. In fact, de-Islamisation, demilitarisation, demotivation and de-empowerment of the Muslims started much earlier than the European colonial occupation. These were firstly initiated by the home-grown evil despots. They did it to keep the monopoly of power in their own hand and to keep the people in a state of perpetual submission. In fact, the enemies of Islam –whether native or alien, take the same strategy to sustain their occupation.

The process of de-empowerment of the *ummah* indeed started with the monopolisation of war by the home-grown enemies of Islam. Such a project made the common Muslims totally incapable to play their own role as the soldiers of Islam. They were made not only silent observers of the despots' war of occupation but also forced to finance their own enslavement by paying high tolls to the ruler. During the rule of the tyrannical Muslim despots, defending the Muslim countries was made hostage to their own whims. Such issues enjoyed little priority or importance in their policy. The demilitarisation of the Muslims by such despotic rulers was so total that while Bengal –the richest state in the contemporary world, was invaded by the private army of the East India Company, no arm or ammunition was found in the hand of the common Bengali Muslims to defend their country. Whereas, defending a country against the *kuffar* invasion is not mere patriotism, is indeed the expression of his true faith. It is a religious obligation on every believing man.

A wolf never preys on another wolf; rather looks for a lone weaker target. The foreign enemies too hunt for the rich Muslim countries with the most demilitarised cum demotivated people. In the past, the divisive and de-militarisation policy of the native despots always

allured the foreign enemies to invade the Muslim lands; and made it much easier for them to take over. This is why Bengal becomes the first target of colonisation by the British in the whole Muslim World. In her most conducive milieu for the enemies, the collusion of the power-hungry Army Chief with the invading British proved catastrophic. It paved the way to end the Muslim rule not only in Bengal but also in the whole of India. The same strategy worked for the enemies in other parts of the Muslim World.

The Islamic obligation and the failure

In the golden days of Islam, the defence of a Muslim state has never been an exclusive domain of the rulers and their cronies. It used to be the binding obligation on everyone. It used to be considered the most crucial issue for every Muslim citizen. According to the Holy Qur'an, any *kuffar* aggression against a Muslim land makes jihad obligatory on every believer on the first day of the aggression. But, how a Muslim can discharge such an obligatory role if he is disarmed by the ruler? It is indeed the ugliest crime that despotic Muslim rulers could commit against Islam and the *ummah*. The practise still continues. The tyranny of autocratic rule is disappearing from most parts of the non-Muslim world, but it is thriving in the Muslim world. They have turned the whole Muslim World into a conglomerate of prison cells for its own citizens. The people in prison cells can't defend themselves -even if killed or tortured. Nor do they get help from the inmates of other cells. The same is true for the Muslim World. Hence, when the people of Gaza are bombed by the Israeli jets, even the injured people can't get access to neighbouring Egypt and the Egyptians don't come to their help either. Thus, they are made hostage in their own land by their own rulers. Because of such a hostage state, whenever the imperialists invaded a Muslim land, its people couldn't play any defensive role. They could only stare at the heavily armed invaders with silent awe.

The only exception and the glory

Amidst tides of surrenders, only the Afghan Muslims could stand as the exception. For that, there exists a noteworthy reason. They were the only people on the earth who were not de-weaponised and de-empowered by their rulers. The per capita weapons in Afghanistan still stand the highest in the whole world. Hence, they could rightly fulfil the religious obligation in defending Islam and their country. This is why, the poor Afghans could show the most spectacular miracles by defeating three contemporary World Powers like the British, the Russian and the Americans while these powers were in their peak of military might. No country in the whole human history could show such valour successfully against three great World Powers.

History has repeatedly proven that staying armed with all necessary weapons is the best deterrence against the enemy offence. Keeping such readiness is indeed a Qur'anic obligation. In this regard, Allah Subhana wa Ta'ala reveals His binding decree: "And make ready against them all that you can procure of the power, including horses of war (in modern days these must be nuclear weapons, tanks, warplanes, drones, missiles, ballistic missiles, heavy artillery, etc.) to instil fear in the heart of the enemy of Allah and your own enemies and others besides whom, you may not know but Allah does know." –(Sura Anfal, verse 60). Such a Qur'anic decree makes it an obligation on every Muslim ruler not only to equip the citizens with the necessary weapons and training but also to mobilise them to the war field so that they can exercise their own obligatory role against any enemy invader. But that is not happening in the Muslim World. Because the usurpers of the Muslim countries have their own agenda that conflicts with the agenda of Allah Subhana wa Ta'la. Since mass militarisation makes their own illegal occupation unsustainable, the enemies –both the home-grown and the foreign, never wish that weapons should fall into the hands of the common people. As if, the common Muslims have no right, duty or obligation to engage in the defence of their own country! This is why after the occupation of Afghanistan, it was the prime strategy of the USA to disarm the Afghan people as a whole. However, it failed.

The enemy monopolisation of war and weapons

In order to give sustenance to occupation and exploitation, the monopolisation of war and weapons by the imperialists and de-empowerment of the Muslims have always been the key strategies since day one of the occupations of any Muslim land. The British colonialists raised more than five hundred princely states in India, but the rulers of these so-called states were not allowed to have an effective army or frame any war strategy. They were used only as a tool to collect revenues, to keep the people de-empowered, and to protect the British monopoly of British goods. The rulers of these vassal states could stay in power only because of their full submission to the colonial hegemony. Now, the direct colonial rule has ended. But the same policy of monopolisation of war by the despots and the de-empowerment of people still continues. They are ready only to give vassalage status to the so-called newly independent states. So these states like Saudi Arabia, UAE, Bahrain, Qatar, Kuwait, and Oman had to allow US military bases on their soil and also support the US military campaign. Once Pakistan had to give the same opportunity to the USA.

Moreover, more have been added to the strategic depth of the enemies' war. Serving the military objectives of the US-led global coalition is not the only imposed obligation, it is also needed to keep the Qur'anic principle away from the affairs of politics, governance, education, culture and judiciary. So, no Muslim country is allowed to introduce sharia law. Like the Indian princely states of the British era, the imperialists created and protect 22 states in the Middle East and 57 Muslim states globally. The matter of defence policy, war policy, warfare and raising or dismantling political boundaries still remain in the hands of the imperialists. The presence of a US-led coalition in Iraq, Syria, Saudi Arabia, Qatar, Kuwait, Bahrain, Yemen, and Mali is only to strengthen imperialists' hegemony in the Muslim World.

The crime and the calamity

Defending the frontiers of a Muslim country is no one's monopoly. Nor is it the exclusive domain of a despot and his pet army. It is also crucial that the command of the Muslims' defence force must not stay in the hands of the non-Muslims at any point in time –contrary to the norm under the European occupation. It must stay as an all-time exclusive domain of the Muslims –as was the rule during the golden days of Islam. Most importantly, it is the religious obligation, as well as the solemn right of every believer. Moreover, fighting in the way of Allah Sub'hana wa Ta'la is not a salaried job, rather the highest *ibadah* in Islam. It is indeed the part of the holy transaction that a believer needs to make with his Almighty Lord –as declared in verse 111 in sura Taubah. As per the transaction, a believer sells his life and wealth to Allah Subhana wa Ta'la in exchange of a place in paradise. And he needs to spend the purchased assets of His Lord that are kept under his custody only in His prescribed way. Fighting in His way is indeed a part of that deal.

As per prophetic narration, spending a moment on the frontier as a defender of the Islamic state is more rewarding than standing the whole night in prayer. And, jihad -the greatest *ibadah*, does not take place in a mosque or on a prayer mat. It happens only when one stands face to face against the enemies in a combat zone. A man can't be a prophet anymore. But he can attain the status of a highly esteemed *shahid* and can stay very near to the prophets in paradise by taking part in jihad. This is why most of the companions of the Prophet (peace be upon him) took that highly honourable route. Hence, during the golden days of Islam, there was no need for any professional army or any cantonment. Instead, the whole *ummah* worked as a solidified army and every Muslim was a soldier. And, the whole land of Muslim *ummah* grew up as a cantonment. The downfall of the Muslim indeed started at a time when such tradition of the early Muslims was forgotten or ignored and the *ummah* stood de-militarised. It is indeed the ugliest crime of the autocrats that brought the worst calamity to the *ummah*.

The fundamental right cum duty of a believer for defending his faith

and country is usurped not only by the non-Muslim imperialist occupiers but also by the so-called Muslim despots. A believer is thus prevented coercively from fulfilling his obligatory duty to fight against the established enemies. This way he is prevented from taking part in jihad. It is indeed one of the most catastrophic consequences of occupation by the external or internal enemies of Islam. Thus a coercive prohibition is imposed on the promised route to paradise. Jihadi spirit and war skills of the common people are perceived as a serious threat to their evil rule. In order to condemn such an original Islamic spirit, they even put a tag of terrorism on it. Whereas, the most terrorising forces in the whole Muslim World are not the Islamists; they are the armies of the tyrannical despots and the imperialists. The main concern of the despots of the Muslim countries is not to defend Islam or independence, but to give sustenance to their own rule. They allow people to grow up only as submissive cowards, and not as death-defying fighters with the Islamic spirit. This way, the brave people are deliberately kept out of the country's security or military corridors. This is why the foreign invaders found it very easy to conquer the countries ruled by the most brutal dictators. The army of such despots show their skills only in quick surrender to the enemies or fleeing from the war fronts. The Arab despots' wars in 1948, 1967 and 1973 against Israel give ample testimony to that.

For an autocratic ruler, war means a battle between two contestant ruling cliques and their pet armies. The common people are kept away from the scene. So, the history books hardly make any mention of the common people. The story of kings, *amirs*, shahs, sheikhs, presidents and other despots occupies the most part of it. Only the palaces of these despots could show their existence, and the dwellings of the common people of the past show no traces of their presence in the history books. In fact, apart from bearing the financial burden of the extravagant corrupt despots, the common citizens are given no political role and responsibility vis-à-vis governance and defence of any Muslim country. Hence, the common people are seldom equipped to do anything else in any war. Whereas, jihad against any *kuffar* occupation is a Qur'anic obligation on every believer. But, such teaching of

Islam stand deeply hidden in the Muslim World. Even the imams of mosques and the teachers of the religious schools seldom mention such Qur'an prescriptions. The ruling despots frame laws, install courts and set vile media to sanitise their oppression -even the genocidal massacres and to vilify the opposition. They deploy a huge team of police, prosecution and pet judges only to punish those who stand against their rule.

The roadmap of failures

The autocratic despots have caused awful other calamities too. It has turned all the value-adding institutions for the common men and women highly dysfunctional, non-functional or corruptive. Hence, the life-changing social engineering institutions like schools, colleges and universities, mosques, madrasah, police academies, civil and military staff colleges are doing more damages to the *ummah* than any good. Instead of promoting an enabling environment for the people, they are generating a culture of de-motivation, de-moralisation and de-empowerment. As a result, the social capital stands very low in almost all of the Muslim countries. The military defeats, the endemic Army coups, the internal strife and other political calamities indeed owe to the failures of these institutions. This is why despite trillions of dollars of unearned money from petroleum, gas, and other resources, the Arab Muslims stay the most powerless and defenceless people on the earth. The despotic rulers in the Muslim world survive only because of the powerlessness of the common people. If these autocrats were put as ruler in any of the western countries, they would have been beheaded or dethroned instantly by the empowered native people –as happened to many of their kings in the past. But, these despots receive constant protection from the western imperialists. Because these tyrants have proved their worth by keeping the Muslims confined in their heavily protected prison cells called states. In absence of such servile rulers, the exploitative interest of the western imperialists would have been in great peril. This is why the western powers keep so strong ties with brutal autocrats like President Abdul Fatah Sisi of Egypt and Mohammad bin Salman of Saudi Arabia.

Moreover, the monopolisation of war in the hand of a power-grabbing army also has its own catastrophic consequence. If the army betrays or collapse, there existed no second line of defence against the enemies. In Muslim history, the failure of these so-called professional armies is huge. They caused awful disasters even in recent years. The secular Army has the minimal appetite to fight any war to the end. In the wars of 1948, 1967 and 1973 against Israel, the coalition of Arab Armies were badly defeated by the tiny Israeli Army. The whole Sinai Valley, the West Bank and the Golan Heights were quickly lost to Israel. Whereas, few thousand Hamas fighters could resist the Israeli advance under continuous air attacks in Gaza for about 50 days. The coalition of Arab Armies couldn't withstand that even for a week. In 1971, the Pakistan Army had the same disgraceful failure in East Pakistan. India did much less bombing in Dhaka and other parts of East Pakistan than the Israeli bombing in Gaza or the US bombing on Mosul. Mosul didn't fall in 9 months, but Pakistan Army with its 45 thousand soldiers surrendered to the infidel Indian army in less than 3 weeks. These so-called professional armies could show their skills only in conquering their own countries. In Pakistan, Turkey, Egypt and many other Muslim countries, they could do that many times. The army could also grab a huge number of residential areas for its officers in major cities.

The continuing de-empowerment of the people and the worsening calamity

Muslim history reveals some amazing and enlightening truths. All the great victories of the early Muslims against the world powers like the Roman and the Persian Empires were not the works of so-called professional armies raised in barracks or cantonments. Such spectacular victories in the whole human history indeed owe to the death-defying common Muslims. Those who defeated the British Army twice on Afghan soil were not any professional army either, they were the Afghan common Muslims. In the last few decades, the two world powers like the USSR and the USA were also defeated in the Afghan soils by the same common people. The USA was also defeated in Vietnam by the same type of volunteer fighters.

On the contrary, the defeat of the professional Bengal Army against the tiny private army of the British East India Company sets an example of how they are useless to serve any Muslim cause. The Army of Nawab Sirajuddaulah –the last Muslim ruler of Bengal, had 50 thousand soldiers, 40 canons and 10 war-elephants on the battlefield of Palashy. Whereas the East India Company had only three thousand soldiers under the command of Col. Robert Clive. But the Nawab lost the war before it started. The betrayal of Mir Zafar –the Commander of the Muslim Army caused the catastrophe.

While an army is raised out of the people with no commitment to Islam, such disastrous failures are natural. Such army professionals quickly change the paymaster if receive a bigger promise. Due to such betrayal in 1757, the Nawab’s Army in Bengal didn’t fight any real war against the British. Not a single shot was fired from any canon. Thus, the British East India Company got an easy victory over a huge area of Bengal, Bihar and Orissa; and the fleeing Nawab was captured and killed. And the common Muslims were kept disarmed and demotivated to play their role in that critical juncture. It was one of the fateful days not only for the Bengali Muslims but also for the Indian Muslims as a whole. The disastrous consequence of the Muslim *ummah* at the hands of the British indeed started from there. When the common people are de-empowered and kept out of the fateful scene, such terrible consequence is not unusual. Awfully, the process of de-empowerment and demilitarisation continues. As a result, the calamity in the Muslim *ummah* doesn’t show any sign of dissolution, rather gets worse.

Muslims' celebration of disintegration & the strategy of collaboration with the enemies

Dr. Firoz Mahboob Kamal

The celebration of rebellion!

The division is forbidden (*haram*) in Islam. But the Muslims celebrate disintegration in the name of national and tribal states. This is the level of deviation of Muslims from Islam. As a result, the Muslims as an *ummah* cease to exist. They exist only as national, racial, tribal, or linguistic identities –as was the case of pre-Islamic Arab idolaters. A human body can't survive with its truncated body parts. Likewise, the *ummah* can't survive with divisive body polity, maps, flags, walls, and borders. Causing division among Muslims has always been the job of the worst enemies of Islam. A true believer can never chase such a path. Despite all mutual differences, dividing Muslims has always been considered *haram* (forbidden) by all schools of the Islamic faith. But still, little effort is being done to unite the Muslims. The division only helps qualify for heavy punishment from Almighty Allah –as promised in sura al-Imran verse 105 in the Holy Qur'an. But awfully, not only they are divided but also celebrate the division with high grandeur.

A Muslim can stay as Muslim only if he fully submits to the wish of

Allah Sub'hana wa Ta'la. And Allah Sub'hana wa Ta'la wishes Muslims' unity. But they preferred to stand disintegrated into 57 Muslim states. What else could be the worst rebellion against the wish of Allah Sub'hana wa Ta'la? Every national or tribal state has a specific day of disintegration. They celebrate those days of rebellion against His Qur'anic command as a mark of national pride! Can rituals like five-time prayer, fasting, hajj, and charity undo such grave crime of rebellion? The Qur'anic command "*la tafarraku*" (don't be divided) is binding on every Muslim. Only those who are stubbornly disobedient to Allah Sub'hana wa Ta'la can ignore such stern warning. Islam is all about the full submission to His all orders, and any disobedience to any order is *kufr*. Those who excel in consistent submission to such Qur'anic orders, earn His blessing. Otherwise, they qualify for His punishment. No amount of religious rituals are a substitute of submission.

The political map of a country tells a lot about its citizens' faith, vision, mission, and survival objective. The current map of the Muslim World is indeed an accurate indicator to show how deeply runs disobedience against Allah Sub'hana wa Ta'la among the Muslims today. It also shows how far they have deviated from the legacy of the Prophet (peace be upon me) and his rightly guided companions. No amount of religious rituals and attire can hide such deviation. It also shows, how the mad obsession with ethnic, linguistic, tribal, and other parochial identities has fully undermined the concept of *ummah* and dismantled Islam's most powerful institution like *khilafa*. Under the new US-led occupation, the same process of disintegration has earned a new life in Iraq, Syria, and Yemen.

In comparison to Muslims' divisive obsession, non-Muslims show far better political sagacity and wisdom. The South Asian Hindus could form the united India, the European colonialists could form the European Union and the American imperialists could forge the United States. They look cosmopolitan, but the Muslims look tribal. Despite the same language, the same ethnicity, and the same geographical landmass, the Arabs have formed 22 states. All-Wise Allah Sub'hana wa Ta'la wants the unity of the Muslims and Shaitan wants disunity. It is

a pity that the Muslims have chosen to please Shaitan. Dividing the Muslim World has always been the key strategy of the enemies of Islam. They support militarily, politically, intellectually, and financially to cause and sustain the disintegration of the Muslims. In 1917, the British and the French launched wars in the Middle East to dismantle *Osmania Khilafa*. With the collaboration of the Arab tribal leaders, they could create 16 Arab states. Thus they could perpetuate the foundation of subjugation of about 300 million Arab Muslims to 5 million Israelis.

The geographical disintegration is the incurable infrastructure of weakness and failure. Even a child knows that. Hence an enemy wants that for the Muslims. In the golden days of Islam, the Muslims had only one state. And the enemies have divided one old province of Syria into 5 independent states. These are Syria, Lebanon, Jordan, Israel, and Palestine. In 1971, the Indians with the Russian help did war against Pakistan to dismantle this largest Muslim country of the contemporary world and could create a captive Bangladesh. Now in Iraq, Syria, and Yemen, the US-led coalition is trying to cause further disintegration of Islam's heartland. It is also their key strategy to do war against anyone who tries to dismantle the divisive walls. So the Muslims are not allowed to break the walls of the prison cells –raised in the name of tribal or national identities. This is why while Saddam Hussain took back Kuwait –the former integral part of Iraq, the USA, and its allies declare war against Iraq. But when India took Kashmir, Israel took Palestine, the same western countries stay silent. The western imperialists don't keep it hidden that their security interest lies in the divided political map of the Muslim World. Again and again, they have shown their full commitment to protecting the current infrastructure. Although they call it the stability of the status quo, it is indeed the strategy to keep the Muslims disintegrated, powerless, and subjugated.

The *Ummah* doesn't exist

Ummah is a pure faith-based construct. It doesn't embrace or glorify any racial, ethnic or national connotation. The physical existence of the *umma* is the most distinguishing marker of *Muslimness* of a people.

To know the true belief of the Muslims, doesn't need any soul-searching effort; it gets expressed through their political polity, identity, ambition, and actions. *Ummah* is indeed the collective political, ideological, cultural, and civilization embodiment of all Muslims. It is the trans-ethnic common global identity of the believers with a solid foundation on their identical faith, values, laws, and political cum civilizational ambition. The conceptual construct of *ummah* provided the early Muslims the much-needed huge infrastructure to emerge as the global civilizational power. Only because of such a faith-based groundwork, the Muslims with diverse ethnicities like the Arabs, the Persians, the Kurds, the Moors, the Turks, the Afghans, the Andalusians, the Balkans, and others could work shoulder to shoulder to bring victories in Asia, Africa, and Europe. In the whole history of mankind, such a united brotherhood of so many different ethnicities never happened before. Otherwise, there is nothing new in conquering lands and establishing empires. The barbaric Mongol hordes, the genocidal European colonialists, and the trigger-happy US imperialists could also conquer huge lands. But they couldn't build any trans-ethnic brotherhood, higher values, sound laws or civilization. Instead, they could build massive infrastructures for genocides, ethnic cleansing, slave trading, economic exploitation, famines, wars and World Wars. Because of their moral void, millions of Indians, Red Indians, Africans, Aborigines, Maoris, Incas, and many others were forced to perish from the surface of the earth. The catalog of their crime is huge. And the legacy still survives. Hence, a culture of occupational wars, genocidal killing, destruction of cities, and economic exploitation still thrives in the modern world. The people of Afghanistan, Iraq, and Syria witnessed that.

The Muslims have their own awful internal problems. The concept of Muslim *ummah* can't survive in a high tide of toxic ideas like monarchism, nationalism, tribalism, racism, secularism, and other man-made ideologies. Nor can it sustain in the absence of the Qur'anic knowledge. For surviving as a true Muslim, every believer needs constant feeding of Islamic thoughts, vision, mission, and objective. Such knowledge is the vital lifeline for the *ummah*. It indeed builds the ideological backbone of a Muslim individual and the *ummah*. Hence,

in Islam, seeking knowledge is a life-long obligation -no less important than regular foods and drinks. Hence, seeking Qur'anic knowledge was made obligatory 11 years before the obligatory five-time prayer. In absence of that, institutions like Muslim *ummah* or *khilafa* can't survive. This is why the enemies always aim at dismantling the educational and cultural institutions of Islam.

The Muslims have badly lost the ideological war –the cold war. It is indeed a strong precursor of defeat in the hot war –the conventional war. The ideological defeat owes to deep deprivation of Qur'anic knowledge. In the name of education, an enemy project to cause knowledge deprivation was executed during the whole colonial occupation of the Muslim World. The colonialists have left but the political power has been hijacked by those who got fully brainwashed by the secularised education system of the colonial era. So, they continue with the same de-Islamisation project of the enemy. As a result, the Muslims stand defeated and the *ummah* has ceased to survive.

With the demise of the *ummah* and its political infrastructure called *khilafa*, the Muslims now face the most catastrophic calamity in the whole history of Islam. In absence of the political cum military infrastructure of *khilafa*, the Qur'anic guidance and the prophet's tradition remain non-functional. True Islam lives only in the Holy Qur'an. Such a state of affairs has indeed generated a perfect recipe for further defeat, occupation, exploitation, and killing. This is why trillions of unearned petrodollars of the Middle East and about 1.5 billion population couldn't help Muslims come out of the current quagmire. Rather, day by day they are sinking down to a new low. They are growing only in number but not in faith and commitment. Like a diseased man, the Muslims are the seat of their own disease and rotten from inside. The crisis is so deep that the Muslims are no more known for their adherence to the Qur'anic guidance. The Qur'anic laws, the pan-Islamic brotherhood, the trans-ethnic institutions like *khilafa* and jihad in the way of Allah Sub'hana wa Ta'la find no place in the Muslim World. They have embraced ideas, laws, values, cultural practices, warfare, and the concept of state-building based on pre-

Islamic *jahiliya*. This is why these so-called Muslim states show little dissimilarities from those of the *kuffars*.

The visible dissimilarities of today's Muslims from the early Muslims are not in the field of religious rituals, names, and nomenclature, but in the purpose of survival. The early Muslims survived to serve the agenda of Allah Sub'hana wa Ta'la. It is to bring victory for His *deen*. But today's Muslims survive to serve national, tribal, monarchical, or party agendas. Allah Sub'hana wa Ta'la's agenda hasn't had any place in their life. All these dissimilarities owe to detachment from the Holy Qur'anic. Most of them finish their college and university education without understanding a single verse of the Holy Qur'an. In the golden days of the Muslims, even a farmworker, a shepherd, and a poor vendor had a better understanding of the Holy Qur'an than a university graduate or a Ph.D. scholar of today. To them, intellectual feeding was no less important than physical feeding. They didn't have any doubt that their *iman* will surely die if they don't take regular feeding from the Holy Qur'an. Hence, learning Qur'an was no less important in the early Muslims' life than eating and drinking. Since the Holy Qur'an has lost its importance in Muslim life today, the huge dissimilarities in faith and action from the early Muslims could crop up so easily.

The early Muslims, at their highest point, didn't have a huge population. Nor did they have a big army. Neither did they have trillions of dollars of unearned wealth like today. But they didn't experience a similar scale of occupation, genocide, rapes, destruction, and eviction as it is the norm in Palestine, Kashmir, India, Myanmar, Uighur, Bosnia, Mindanao, Afghanistan, Syria, and Iraq. Rather, they made the history of miraculous successes against the contemporary big powers. They could raise the Muslims as the most powerful World Power. But today, the Muslims are the most defenseless people on earth. They have armies and weapons, but these are not to protect Muslim men and women. These are only to protect the despotic rulers and bomb the freedom-seeking people –as currently happening in Syria and other Middle East countries.

Moreover, arms and ammunition don't decide the fate of a people. Arms

don't fight any war, rather the people who carry the arms do the job. Hence, the quality of the soldiers is decisive that the quality and quantity of arms. The current state of the Arab World gives testimony to it. It is reported that from the year 2000 to 2019, Israel received arms from the USA, UK, France, Spain, and Germany of value 9.6 billion dollars. Whereas in the last 20 years, Saudi Arabia alone received arms of 29.3 billion dollars. In the same period, the arms sale to UAE was 21.1 billion. It was 17.5 billion dollars to Egypt and 6 billion dollars to Qatar. (The Daily Dawn, Karachi, 29.05.2021). But, what is the outcome of such a huge amount of arms in the Arab hands? Did it increase their military might? The jointly run war by Saudi Arab and UAE is failing badly against the poor fighters in Yemen.

The strategy of collaboration with the enemies

The enemy's crusade against Islam and the Muslims never ends. It only changes the strategy and frontiers. They start new wars on new frontiers. The First World War ended in 4 years. The Second World War ended in 5 years. But the US-led current war against Islam and the Muslims doesn't show any sign of ending even in its 20th year. They are inventing more clues and new narratives to enter into new territories. The current crusade –declared exactly as a crusade by President George W. Bush, started in Afghanistan in 2001 to dismantle the Islamic rule of Taleban. It has now expanded to Iraq, Syria, Libya, Somalia, Yemen, Mali, Chad, Central Africa, and other territories. It is also true that the enemies of Islam have stopped winning any of their wars. They can only continue the killing and the destruction. Even the former US President Donald Trump acknowledged the fact in one of his speeches. Even the US-led coalition of 60 countries couldn't gain control over 20 percent of Afghanistan in 16 years. The same is true in Iraq, Syria, and Yemen. They can only prolong the war to delay Islam's resurgence as a global power. So, the current war will continue for many more decades to add more devastating miseries. Hence, there exists little doubt that more difficult days are lying ahead for the Muslims. Many more Muslim countries are in the queue to receive the

same brutalities, deaths, and destruction as happening now in Palestine, Afghanistan, Iraq, Syria, Somalia, Mali, and Yemen. This is the price that the Muslims are now subject to pay for their division, deviation, and servile adherence to the established enemies of Islam. Such a punishment is indeed an unfaltering Qur'anic promise. For failing to do the assigned job, more severe punishment is waiting for them in the hereafter.

Now it is the policy of the US-led coalition to reinforce their war machines to drop more bombs, drones, and missiles on the Muslim cities and villages. Every year they increase their defense budget and desperately search for new killing machines. Russia, China, and India are doing the same. Now the whole Muslim World is under the constant surveillance of the multi-racial imperialists. They have divided the area of influence among themselves. What Israel is doing in Palestine, India is doing the same in occupied Kashmir. And China is doing the same in occupied Eastern Turkistan called Xing Xiang. More bombs are dropped in Syria than were dropped in any single country like Germany, Japan, France, or England in the First or the Second World War. Whoever raises the head in the name of Islam is labeled as a terrorist. His home is marked as a target for a drone attack. For being killed, he doesn't need to engage in any war on the US or European soil. This is the new reality imposed on the Muslim World.

In the name of fighting Islamists, cities after cities are bombed to rubble in Muslim countries. Drones are hitting homes in Pakistan, Yemen, Afghanistan, Syria, and Somalia. Thousands of innocent men, women, and children are being killed. About sixty countries are drawn into the US-led war against the Muslims. Such a huge number of states were not involved even in World Wars. Therefore, apart from occupations, destructions, and killings, they have attained spectacular success to create a global *ummah* of *kufr*. This *ummah* of *kufr* is also glued together by similar faith, values, political aim, and commitment. To resist the resurgence of Islam, they are ready to do any war in any part of the world. In order to solidify their occupation and to install their own cronies in the occupied lands, they have imposed a policy of forced eviction of people from their own

homes -as Israel did in Palestine.

Readiness for the surrender

Muslims have now reached a new phase in history. They do not have any strategy to face the enemies. Instead, they are in a haste to make full surrender. They even search for ways to work as the enemies' partners in occupation, arson, and genocidal massacre. Therefore, President Erdogan of Turkey decided to work with killer President Vladimir Putin. President Putin has occupied Syria and has appeared as the sole protector of killer Bashar al-Assad. The Russian soldiers are also working in Libya and Central Africa. The Turkish Army also worked with the US Army in running the occupation in Afghanistan. They call such collaboration with the enemy wisdom (*hikma*). While working with the devils one can't avoid doing evils. In the past, Sheikh Abdullah of Kashmir, Sheikh Mujibur Rahman of Bangladesh, President Musharraf of Pakistan, and Hamid Karzai of Afghanistan followed the same strategy of collaborating with the occupiers. The lust for worldly gains inspires these stooges to forget the consequence in the hereafter. Likewise, millions of de-Islamised Muslims join the US-led *ummah* of *kufr* to kill their fellow Muslims. Many of them are engaged in the intellectual war against Islam and Muslims. This is an unprecedented event in Muslim history. Even the tyrants like Pharaoh, Nimrod, and the Arab infidels couldn't think of such recruitment of Muslims as their foot-soldiers in the past.

The enemies of Islam didn't make any error in discovering the real source of Muslims' strength. They correctly discovered that the Holy Qur'an and the unity of the Muslims stand against their agenda. So, they are at war on both fronts. During their colonial rule, they built religious schools to create a class of *ulama* who will encourage people to recite the Qur'an and not to understand it. And causing geopolitical disintegration of the Muslim World is their key. Hence they created 22 Arab states. Now they drop bombs to destroy the physical infrastructures like the roads, bridges, homes, and hospitals. Thus they are doing everything to block the emergence of

Muslims as a united and viable *ummah*. As a part of the same project, Israel is not the only creation. They have created countries like Saudi Arabia, Kuwait, Qatar, UAE, Syria, Jordan, Bahrain, Oman, and others to serve the same imperialistic agenda. This way the 22 Arab states didn't increase Muslims' power, rather enhanced the security of Israel and the USA.

The USA's love for the autocrats

Like Israel, these artificial Arab states also received quick recognition by the imperialist countries, the imperialist-owned League of Nations, and later on by the UN. The map of the Arab World was drawn by the imperialists to protect the interest of the imperialists. Never a plebiscite took place to know the opinion of the native people. This is the type of democracy that the US-led imperialists prescribe for the people in the occupied Muslim lands. In each of these Arab states, they installed a dynasty of the most submissive and servile clients who never show any willingness to give any share of the political power to their own citizens. The US government and its allies have shown their intense love for these cruel autocrats. They also take the full burden of protecting them. They have already shown their readiness to fight any war to protect them from their people.

In return, the rulers of these oil-rich Arab states follow a strategy of full collaboration with the imperialists. Protecting the economic and strategic interests of the western imperialists is the core agenda of these rulers. Hence, the USA enjoys the full liberty to build bases for its Air Force, Land Force, and the Navy in any part of the heart of the Muslim World. From these bases, they can easily target any Muslim city, industry, bridge, or home with better precision. Western companies also enjoy the full monopolistic access to drain oil and gas from these countries. As a result, trillions of dollars of the Muslim World do not stay in the Muslim lands, rather go directly to those who have already declared an unending crusade against Islam. The US dollar could attain the status of an international currency only because of this Muslim money funneled into the US economy. Due to the continuous

flow of this Muslim money, the USA could sustain its ongoing war in Afghanistan, Iraq, Yemen, and Syria -an area much larger than the whole of Western Europe and for a period much longer than the total duration of two World Wars. So, they do war against the Muslims with Muslims' money.

In the creation of these new states, the imperialists had another sinister objective. It is to prevent the spill-over of their unearned huge wealth to the poor Arabs living in neighboring Yemen, Jordan, Palestine, Syria, Egypt, Sudan, and Mali. Such dispersion of wealth to the poor Arabs would have reduced the share of western imperialists; hence could badly damage their economic interest. Restrictive borders of these oil and gas-rich states thus provide huge protected wealth for the imperialists' consumption. This is why the US and its ally do not hesitate to tell that the economic interest of the West, as well as their national security, lie in this Middle Eastern oil and gas. As if, this oil and gas belong to the western companies. And to keep this ownership, the imperialists are keen to protect these servile rulers, at any cost.

Thus, extreme western selfishness works here to protect this ugly status quo. Unless the oil and gas reserve gets finished, there is little chance that the imperialists and their cronies will come to the sense to remove the disastrous division of the Arab World and end the ongoing war. Whoever protests against this robbery of the Muslim wealth and stand for the democratic right of the people are blamed as a terrorist. Bashar al-Assad has killed more than 2 hundred thousand people in Syria, and half of the population are driven out of their home. He used chemical bombs, cluster bombs, and barrel bombs on the civilian population. The western countries who lecture on human rights didn't throw a single stone against his army. Now they are lecturing on making peace with this murderous devil.

Bashar al-Assad is not the only dictator engaged in a genocidal mission. Israel is doing the same crime for more than 70 years. Other despots in the area are ready to commit the same brutal massacre if the people come down to the streets for their democratic rights like the brave Syrians. Their deep hatred against human rights and people's
